1
      CLAIMS
  2
      1. Pseudodipeptide characterized in that it has the
  3
  4
      following general formula (I):
  5
  6
  7
  8
  9
 10
                                                        (I)
 11
 12
     in which :
 13
           - R_1 represents a hydrogen atom , an acyl or
 14
15
           acyloxy radical,
           - R2 represents the side chain of an alpha-amino
16
           acid chosen among L-glutamic acid, L-arginine, L-
17
           cysteine, L-methionine, L-histidine, L-
18
19
           tryptophan, L-tyrosine.
20
     2. Pseudodipeptide according to the claim 1,
21
22
    characterized in that it is the alpha-L-
    glutamyltryptamine, L-methionyltryptamine and L-
23
24
    tryptophantryptamine.
25
    3. Pseudodipeptide according to claims 1 or 2,
26
27
    characterized in that it is the alpha-L-
    glutamyltryptamine.
28
29
    4. Pseudodipeptide according to the claim 1,
30
    characterized in that R_1 represents an acetyl or ter-
31
    butyloxycarbonyl radical, and R_2 represents the side
32
```

- l chain of an alpha-amino acid chosen among L-glutamic
- 2 acid, L-methionine and L-tryptophan.

3

- 4 5. Analog of the pseudodipeptide according to the claim
- 5 3 resulting from the intramolecular cyclisation of the
- 6 glutamic radical in a pyroglutamic radical.

7

- 8 6. Chemical process for the preparation of the
- 9 pseudodipeptides according to one of the claims 1 to 4,
- 10 the said process comprising following steps:
- 11 a) protection of the alpha-amino function of the L-
- 12 amino acid with an acyl or acyloxy radical,
- 13 b) coupling of the N-protected L-aminoacid to
- 14 tryptamine,
- 15 c) removal or not of the N-protecting group according
- 16 to the seeked pseudodipeptide.

17

- 18 7. Process according to the claim 6, in which the L-
- 19 amino acid is the glutamic acid and in which step a) is
- 20 followed prior to step b) with an esterification step
- 21 of the gamma-carboxylic function with an alkyl radical.

22

- 23 8. Process according to the claim 6, in which the N-
- 24 protecting groups are chosen among acetyl or ter-
- 25 butyloxycarbonyl radicals.

26

- 27 9. Neurocosmetic composition characterized in that it
- 28 contains a pseudodipeptide of general formula defined
- 29 according to one of the claims 1 to 5, in combination
- 30 with one or several appropriated cosmetically
- 31 excipients.

32

- 1 10. Use of a pseudodipeptide according to one of the
- 2 claims 1 to 5 as neurocosmetic agent displaying a
- 3 cytoprotecting effect towards cutaneous nervous cells
- 4 submitted to an ultra-violet radiation.

5

- 6 11. Use of a pseudodipeptide according to one of the
- 7 claims 1 to 5 as neurocosmetic agent intended for
- 8 slowing down the neurodegeneration process.

9

- 10 12. Use of a pseudodipeptide according to one of the
- 11 claims 1 to 5 as neurocosmetic agent intended for
- 12 fighting against the neurogenic inflammation.

13

- 14 13. Use of a pseudodipeptide according to one of the
- 15 claims 1 to 5 as neurocosmetic agent able to stimulate
- 16 the cutaneous immune cells.
